VelQuest® and IASC to provide GMP Electronic Notebook Solution for Major Pharmaceutical Company in Puerto Rico

Award winning SmartLab™ GMP Electronic Notebook System to reduce costs and improve productivity in Puerto Rico pharmaceutical company.

Hopkinton, MA, and San Juan, PR, April 19, 2007 — VelQuest Corporation and IASC Corporation announced today a project to deliver VelQuest's award-winning GMP Electronic Notebook System to a major pharmaceutical production facility in Puerto Rico. IASC partners with VelQuest Corporation in the Caribbean region, with an emphasis on QC/QA departments among the vast number of pharmaceutical manufacturing plants in Puerto Rico.

Following a project scope and planning phase, the project will drive to fully automate the entire QC/QA lab data management and compliant method execution processes including: laboratory instrument integration, electronic access to test methods and SOPs, and connectivity with LIMS and ERP systems.

"The VelQuest and IASC relationship provides a leadership role in laboratory automation solutions for the Puerto Rican life sciences industry by combining best-of-breed technologies with proven industry experience and integration practices." said Jose E. Correa, President of IASC. "To gain operational efficiency, these life science companies need to use tools that allow analysts and operators to focus on science instead of paperwork. By automating lab operations, manual documentation tasks on paper become a thing of the past." Correa continues, "VelQuest's SmartLab™ GMP Electronic Notebook System is a fundamental building block for achieving this goal for the pharmaceutical industry."

About VelQuest Corporation

Founded in January, 1999, VelQuest Corporation provides a suite of configurable off-the-shelf software products to help transition regulated industries from labor-intensive, paper-based operations to automated, efficient systems with greater confidence in compliance than ever before possible.

The SmartLab™ solution uses VelQuest's electronic Process Management & Compliance (ePMC™) Core Operating System. This innovative "method-centric" software automation platform is designed to provide the foundation for compliance-based activities in the life science markets. The software embraces the FDA's "cGMPs for the 21st Century: A Risk Based Approach" initiative, and supports the company's applications such as SmartLab™ GMP Electronic Notebook System, SmartShell™ 21 CFR Part 11 instrument and application remediation software, and SmartBatch® electronic batch record system.

VelQuest is a registered trademark of VelQuest Corporation. SmartLab, SmartShell and SmartBatch, and ePMC are trademarks of VelQuest Corporation.

About Intelligent Automation & Systems Compliance (IASC) Corporation

Founded in Puerto Rico, IASC is an IT compliance consulting and system integration firm with a life sciences practice specialized in the implementation, and optimization of laboratory informatics systems for the pharmaceutical, biotechnology and medical devices industries. IASC services include user requirement definitions/scoping, project implementation, system and instrument integration and training. For more information, contact IASC at 787-400-2004.
